

**CONSENT FOR INTRAVENOUS GENERAL/SEDATION ANESTHESIA**  
**PAGE 1 OF 2**

Patient's Name \_\_\_\_\_

Date \_\_\_\_\_

**Please initial each paragraph after reading. If you have any questions about your proposed treatment, please ask your doctor BEFORE initialing or signing this form.**

You have chosen **Intravenous general/sedation anesthesia** for your treatment. You have the right to be informed about this so that you can decide whether to have it or not after knowing the risks and benefits. These common procedures are considered quite safe. Nevertheless, all procedures have some risks. They include the following and others:

- \_\_\_\_\_ 1. Discomfort, swelling or bruising where the drugs are placed into the vein.
- \_\_\_\_\_ 2. Vein irritation, called phlebitis, where the drugs are placed into a vein. Sometimes this may grow to a level of discomfort or disability where it may be difficult to move your arm or hand. Sometimes medication or other treatment may be required.
- \_\_\_\_\_ 3. Nerves travel next to the blood vessels where the drugs are placed into a vein. If the needle hits a nerve or if drugs or fluid leaks out of the vessel around a nerve, you may have numbness or pain in the nerve where it runs along the arm. Usually the numbness or pain goes away, but in some cases, it may be permanent.
- \_\_\_\_\_ 4. Allergic reactions (previously unknown) to any of the medications used.
- \_\_\_\_\_ 5. Nausea and vomiting, although not common, are possible unfortunate side effects. Bed rest, and sometimes medications may be required for relief.
- \_\_\_\_\_ 6. Intravenous sedation anesthesia is a serious medical procedure and, whether given in hospital or office, carry the risk of brain damage, stroke, heart attack or death.

**YOUR OBLIGATIONS:**

- \_\_\_\_\_ 7. Because anesthetic or sedative medications (including oral premedication) causes drowsiness that lasts for some time, you **MUST** be accompanied by a responsible adult to drive you to and from surgery, and stay with you for several hours until you are recovered sufficiently to care for yourself. Sometimes the effects of the drugs do not wear off for 24 hours.
- \_\_\_\_\_ 8. During recover time (normally 24 hours), you should not drive, operate complicated machinery or devices or make important decisions such as signing documents, etc.
- \_\_\_\_\_ 9. You must have a completely empty stomach. It is vital that you have **NOTHING TO EAT OR DRINK FOR six (6) hours** prior to your treatment. TO DO OTHERWISE MAY BE LIFE THREATENING.

**CONSENT FOR INTRAVENOUS GENERAL/SEDATION ANESTHESIA**

Page 2 of 2

\_\_\_\_\_ 10. **Unless instructed otherwise**, it is important that you take any regular medications (high blood pressure, antibiotics, etc.) or any medicines given to you by your surgeon **using only a small sip of water.**

**CONSENT**

I have read and understand the above paragraphs and realize that conscious sedation or general anesthesia carry have certain serious risks. I request that my choice be used for my treatment. All my questions have been answered before signing this form. I fully understand the risks involved. I certify that I speak, read and write English.
